

Dear All,

With Pleasure and with a Honor of Pride ,This is to inform you all that First Bronchoscopy Surgical Procedure (Diagnostic and Therapeutic) was done Successfully in Our Hospital in a Very Seriously Ill, Pediatric Patient named Master Ranvirsinh Rathod,age 2 years, from Vijhapur. And it really gives a New Life to the Child.

The child came in Our Goenka hospital at about 3-00 pm with complaint of Severe Difficulty in Breathing. His condition was very critical. The child has accidentally aspirated a peanut. The peanut has been reached in Lungs. So the Lungs of that Child were collapsed. (Kindly see X-ray-1 attached with mail).

Here, in our ER Ward, Immediate and Prompt actions were taken by Our Anesthetic Team, Medical officers on Duty, Nursing Staffs and all. Immediate oxygen therapy and other Supportive Therapy was given. Patient was immediately seen by our full time Paediatirician.Immmediate Bronchoscopy was done by Pediatric Surgeon. And During Bronchoscopy Exact

Location of Peanut in Lungs was found and it was removed nicely from there.

At present, the child is Out of Danger. His lungs are clear. He is taking easy Breathing at Present. (Kindly see the X-ray-2 attached with this mail)

Dear All,

Our Goenka Hospital has always Succesfully treated Such Severe and Life threatening Cases.

Always feel pride to be a Part of Goenka Hospital Organization & Family. Still, we all, as a Team, will have to work still more and more for Our Organization.

Thanks & Regards,

Dr.Manoj Kodwani
Medical Administrator
